

Our vision is clear.

As the world becomes increasingly digitized, children become more vulnerable to risks. The **Internet Crimes Against Children** task force is committed to creating a world where children are safe and protected from online exploitation.

The Illinois Attorney General's Office, High Tech Crimes Bureau, ICAC program delivers virtual training to children, teens, and parents/guardians that provide valuable information on how to stay safe and avoid online risks. We invite you to attend a two-part webinar hosted by the Illinois Association of Court Appointed Special Advocates.

Part I: "Understanding Your Family's Digital Habits" will get parents/guardians thinking about their family's relationship to technology, provide information regarding parenting styles and their correlation to specific online behaviors, and offer suggestions to create a family plan.

Part II: "Maintaining a Safe Online Environment" will offer safety recommendations, regarding accounts creation, privacy settings, image-sharing, parental controls and monitoring, and more.

Please join us
Tuesday, March 23rd
@ 11:00am
